

Compras públicas e consumo sustentável

Rui Frazão
Março 2010

Estrutura da apresentação

- Desenvolvimento sustentável
- Plano de acção da UE sobre consumo e produção sustentável
- Compras públicas e consumo sustentável
 - Estudo sobre compras públicas ecológicas na UE
 - Contribuição para metas do Plano de Prevenção de Resíduos Urbanos
 - Contribuição para Estratégia de Desenvolvimento Sustentável

Desenvolvimento Sustentável

*“não é um estado fixo de harmonia, mas antes um **processo de mudança**, através do qual:*

- a exploração de recursos,*
- o direccionamento dos investimentos,*
- a orientação do desenvolvimento tecnológico e*
- as mudanças institucionais*

se vão tornando consistentes com as necessidades das gerações actuais e futuras”

(Relatório Brundtland, 1987)

Desenvolvimento Sustentável

Joanesburgo 2002:

- erradicação da pobreza
- mudança dos padrões insustentáveis de produção e consumo
- protecção e gestão da base de recursos naturais do desenvolvimento económico e social
- desenvolvimento sustentável num mundo globalizado

Sustainable Development

Introduction

Sustainable Development stands for meeting the needs of present generations without jeopardizing the ability of futures generations to meet their own needs – in other words, a better quality of life for everyone, now and for generations to come. It offers a vision of progress that integrates immediate and longer-term objectives, local and global action, and regards social, economic and environmental issues as inseparable and interdependent components of human progress.

Sustainable development will not be brought about by policies only: it must be taken up by society at large as a principle guiding the many choices each citizen makes every day, as well as the big political and economic decisions that have. This requires profound changes in thinking, in economic and social structures and in consumption and production patterns.

2009 Review of the EU Sustainable Development Strategy (EU SDS)

In July 2009 the Commission adopted the [2009 Review of EU SDS](#). It underlines that in recent years the EU has mainstreamed sustainable development into a broad range of its policies. In particular, the EU has taken the lead in the fight against climate change and the promotion of a low-carbon economy. At the same time, unsustainable trends persist in many areas and the efforts need to be intensified. The review takes stock of EU policy measures in the areas covered by the EU SDS and launches a reflection on the future of the EU SDS and its relation to the Lisbon strategy.

The review will be complemented by Eurostat's bi-annual monitoring report on sustainable development which will be published later in 2009.

Progress report

The European Commission adopted in October 2007 the [first progress report](#) on the Sustainable Development Strategy

Estratégia de Desenvolvimento Sustentável da EU (2006)

Desafios:

- Alterações climáticas e energia limpa
- Transportes sustentáveis
- Consumo e produção sustentáveis
- Conservação e gestão de recursos naturais
- Saúde pública
- Inclusão social, demografia e migrações
- Pobreza global e desafios do desenvolvimento sustentável

Estratégia de Desenvolvimento Sustentável da EU (2006)

Consumo e produção sustentáveis:

- Promover o consumo e a produção sustentáveis mantendo o desenvolvimento social e económico dentro da capacidade de carga dos ecossistemas e dissociando o crescimento económico da degradação ambiental
- Ter por objectivo alcançar, até 2010, um nível médio de contratos públicos ecológicos na União Europeia igual ao atingido actualmente pelos Estados-Membros com melhor desempenho

Enterprise policy integration

Action Plan for sustainable consumption and production (SCP) and sustainable industrial policy (SIP)

Much can be done to make the way we consume and produce in Europe more sustainable.

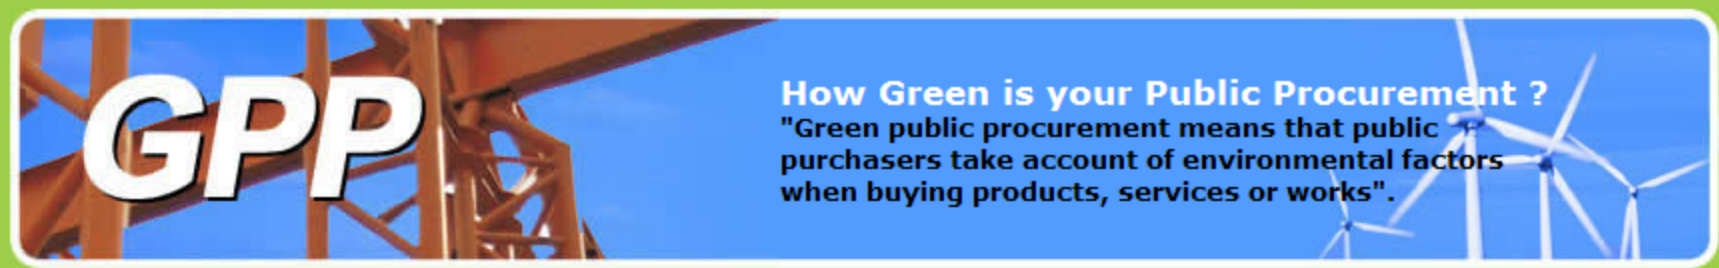

This can be done **without additional costs for European companies and consumers** and can bring benefits, either through energy and natural resources savings or by grasping **new opportunities** offered by a "green" economy.

Plano de Acção da EU Consumo e Produção Sustentáveis (2008)

- Medidas de ecodesign
- Rotulagem ambiental e energética
- Incentivos para o consumo de produtos mais eco-eficientes, incluindo compras públicas
- Trabalho com retalhistas
- Apoio às indústrias mais eco-eficientes

A Helpdesk for GPP

We are pleased to announce the launch of a new Helpdesk for GPP.

The Helpdesk will handle all your questions about GPP, especially complex ones which go beyond the Frequently Asked Questions, and keep track of any relevant developments on the issue. It can be used by all interested parties such as policymakers, public authorities, public procurement officers, trainers, producers and suppliers, and environmental groups.

The Helpdesk will also support the Commission in the promotion and dissemination of information about GPP. The helpdesk will collect and list data concerning all aspects of GPP, including case studies, and organisations and networks that are involved in GPP. It will as well

- ### Events
- "Green public procurement - Lead the change" National Conferences
- Bratislava, 14 October 2009
 - Bucarest, 9 November 2009
 - Sofia, 17 November 2009
 - Warsaw, 11 December 2009
 - Ljubiana, 4 February 2010
 - Pisa, 25 February 2010

Collection of statistical information on Green Public Procurement in the EU

Report on data collection results

Valores globais

Figure 1: Overall scores on indicator 1

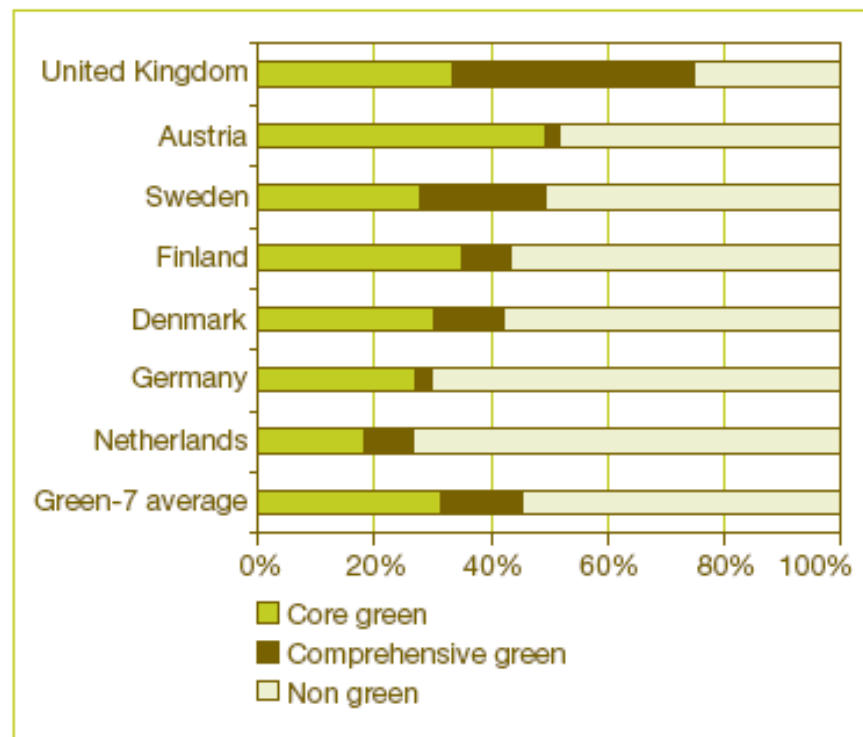

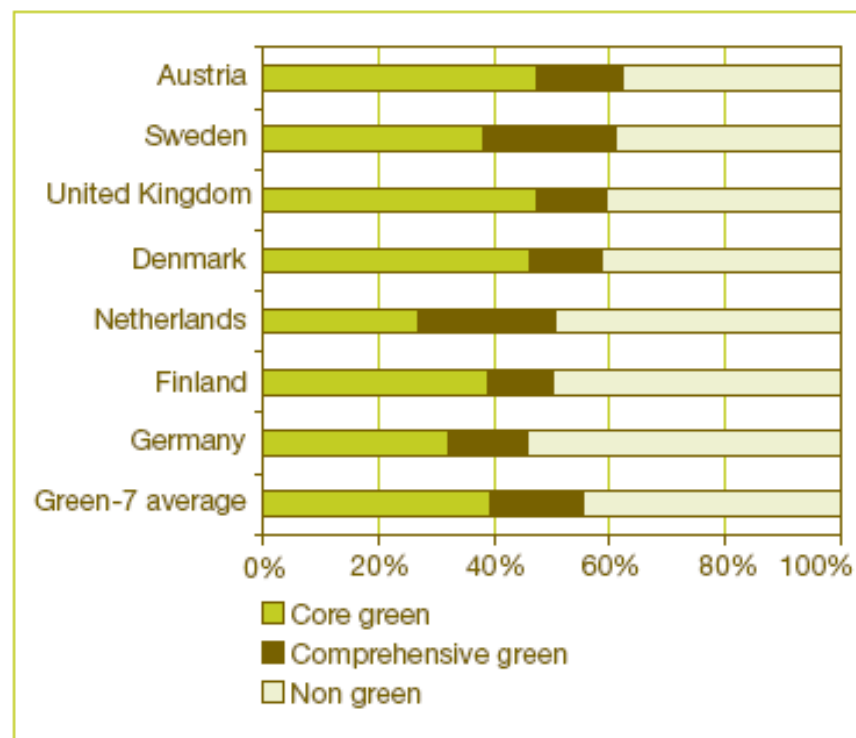

Figure 2: Overall scores on indicator 2

Valores por grupo produtos

Figure 3: Scores on indicator 1 per product group. The figures represent averages of the seven countries under scope.

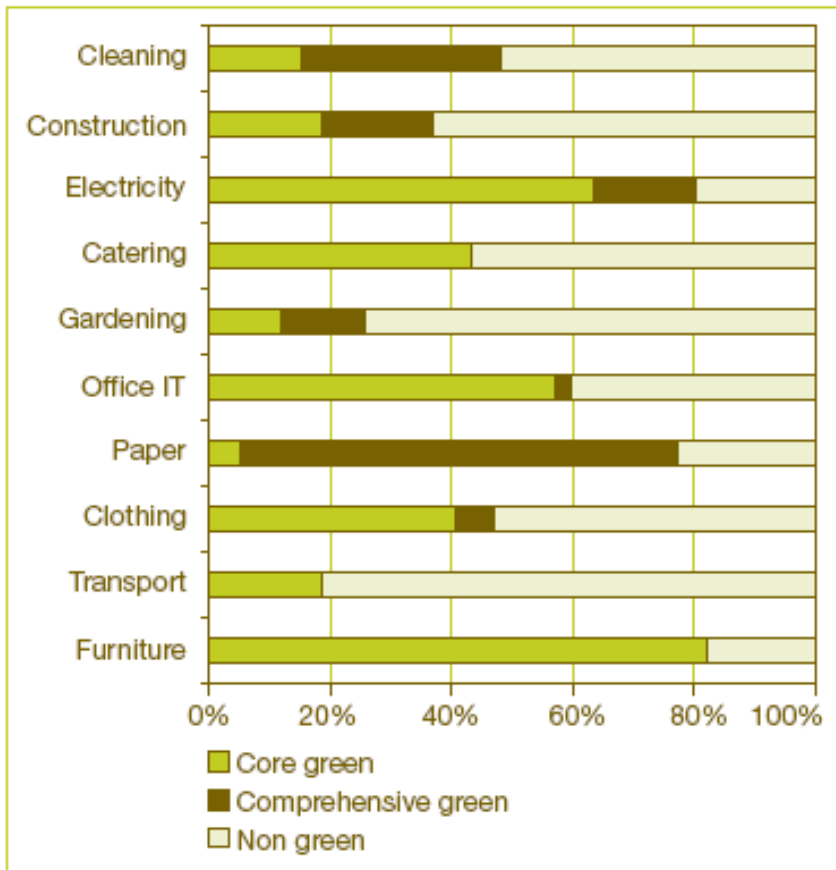

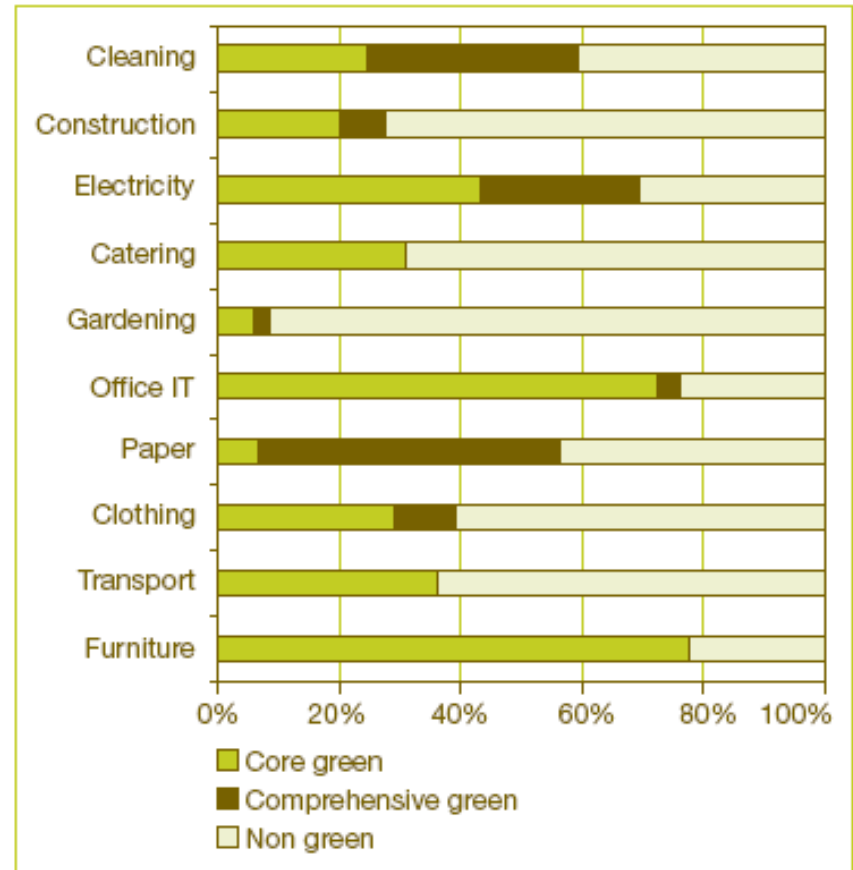

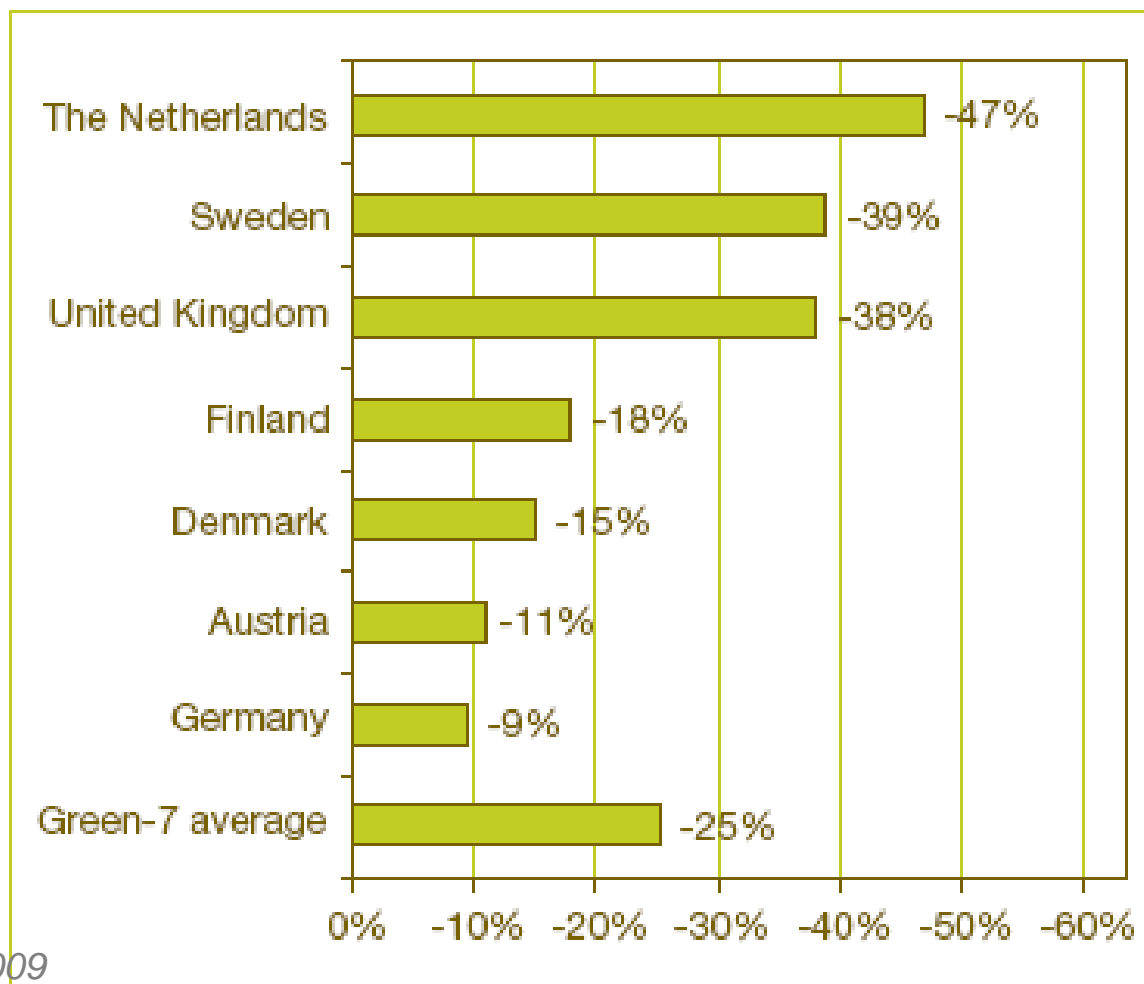

Figure 4: Scores on indicator 2 per product group. The figures represent averages of the seven countries under scope.

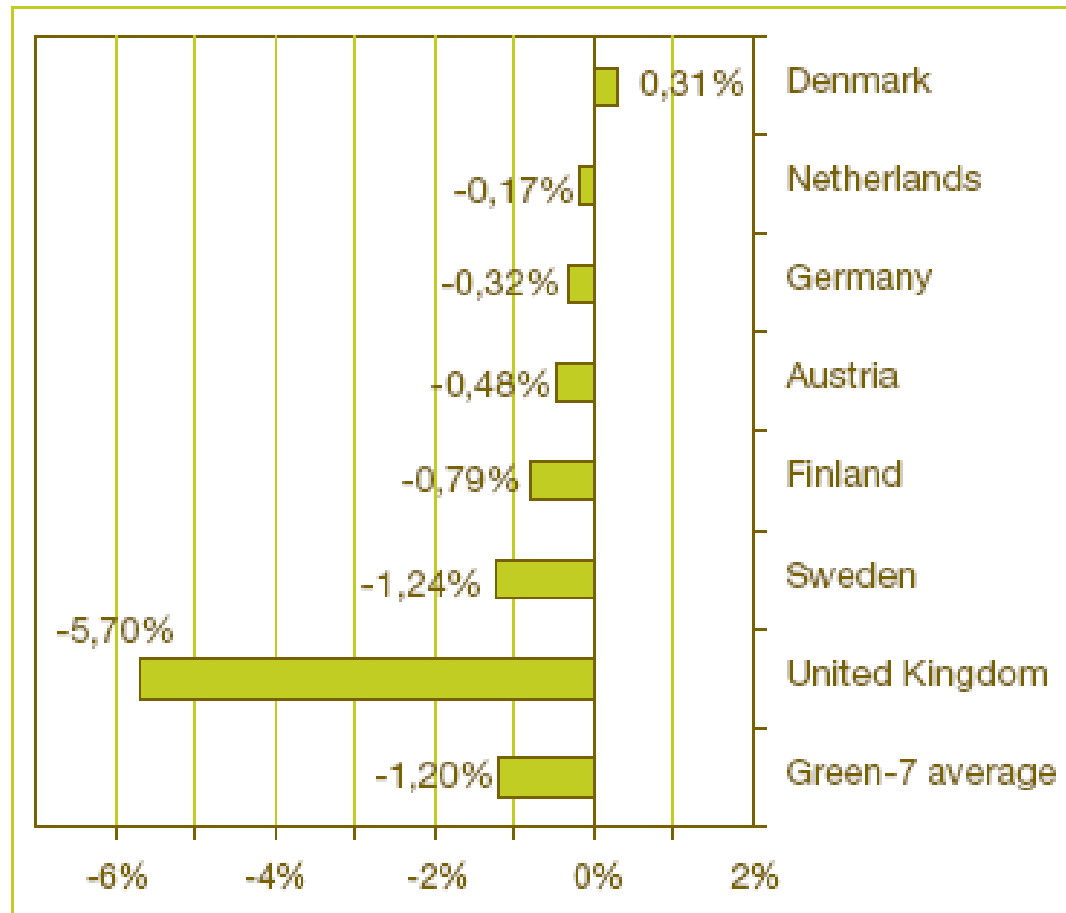

Impacte nas emissões de CO₂

Figure 5: CO₂ impact of GPP per country. Negative numbers imply reductions in CO₂ emissions

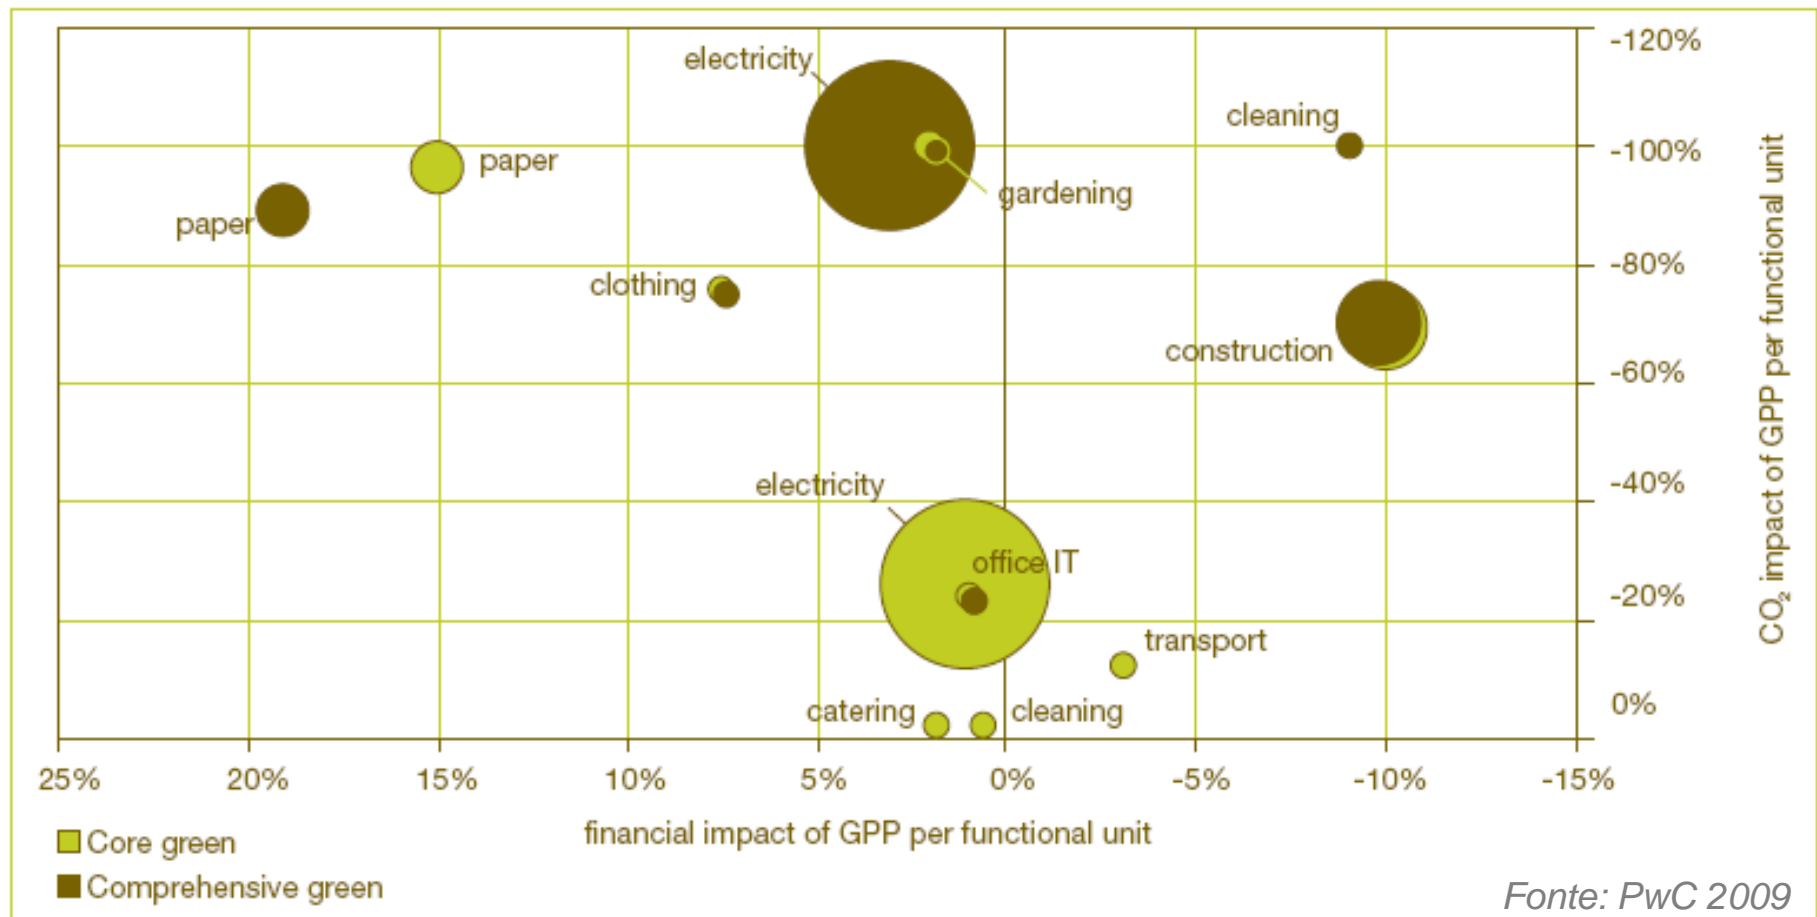

Impacte financeiro

Figure 6: Financial impact of GPP. Negative numbers imply cost reductions and positive numbers imply increases in costs.

Impacte por unidade funcional

Figure 7: CO₂ impact and financial impact of GPP per functional unit. Negative numbers imply lower CO₂ emissions or lower costs and positive numbers imply higher costs.

Programa Prevenção Resíduos Urbanos

- Minimizar quantidade e perigosidade dos resíduos urbanos
 - Eliminar
 - Reduzir
 - Reutilizar
- Metas para 2016

→ *Relacionar compras com a quantidade de resíduos gerados*

Estratégia de Desenvolvimento Sustentável da EU

Revisão de 2009:

- Alguns progressos na dissociação uso recursos naturais e degradação ambiental // crescimento económico
- Modelos de consumo têm evoluído de forma claramente desfavorável
- Plano de Acção ainda está no início
- Contratos públicos ecológicos:
 - Regulamento Energy Star
 - 50% CPE 2010
